RAVEEN SANDINU ABEYDEERA

UNDERGRADUATE - SOFTWARE ENGINEERING
LinkedIn | Portfolio | raveen.s.abeydeera@gmail.com | (+94) 72 495 8938

Objective

Seeking a software engineering internship to apply my full-stack development skills and passion for modern software design in solving real-world challenges while expanding my technical capabilities..

Experience

Full-Stack Project – Academic – ICBT – Wildroute :- Intelligent Human-Elephant Conflict (HEC) Mitigation System (PWA) ***Dec 2025 – March 2026***

- **Project Overview:** Wildroute is a full-stack Progressive Web Application (PWA) built using the MERN stack (MongoDB, Express.js, React.js, Node.js). The application serves as an interactive mapping tool, efficiently managing RESTful APIs and database operations through its backend. It features a responsive, modern user interface designed with Tailwind CSS.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB (Mongoose), Tailwind CSS, Leaflet/Mapbox, Cloudinary, JWT, bcrypt.
- **Key Features:**
  - Interactive mapping functionality powered by Leaflet and Mapbox.
  - Secure user authentication implementing JWT (JSON Web Tokens) and bcrypt for password hashing.
  - Cloud-based media handling and secure storage through Cloudinary.
  - Progressive Web App capabilities for offline access and native-like performance.

Mobile App Development Project -- Academic -- ICBT – Luxe Vista Resort App
Aug 2025 - Oct 2025

- **Project Overview:** LuxeVista Resort is a native Android application engineered to act as a premium digital concierge, enhancing the guest experience at luxury resorts. The app provides a seamless, centralized platform for guests to manage their entire stay, from the initial booking to utilizing resort amenities.
- **Tech Stack:** Android SDK, Java/Kotlin, SQLite/Firebase (Based on typical Android native stacks).
- **Key Features:**
  - Robust room booking system equipped with date-based availability filtering.
  - Integrated service reservation system allowing guests to book amenities like Spa treatments and Dining.
  - Secure user account management system to protect guest data and reservation details.

Web Application Project - Academic – ICBT --- Greenlife Wellness
Aug 2025 – Sep 2025

- **Project Overview:** Greenlife Wellness is a comprehensive web-based platform developed to streamline and manage the daily operations of a wellness center. The system acts as a bridge between the business and its clients, featuring dedicated dashboards for booking and management.
- **Tech Stack:** HTML, CSS, JavaScript, PHP/Node.js, MySQL (Based on your skills and standard web platforms).
- **Key Features:**
  - Interactive client portal allowing users to browse wellness services and view detailed therapist profiles.
  - Real-time online appointment booking system.

    - Secure client dashboard for managing personal profiles, modifying settings, and tracking past/future bookings.

Software Development Project - Academic Project – ICBT --- Pet Shop Management System
Jun 2023 – Aug 2023

- **Project Overview:** The Pet Shop Management System is a robust software engineering project focused on backend logic and inventory control. Designed fundamentally around core Object-Oriented Programming (OOP) principles, the system ensures scalable and maintainable code for managing staff and stock.
- **Tech Stack:** Java, Java Swing (GUI), MySQL/SQLite.
- **Key Features:**
    - Dual interface support featuring both a Java Swing GUI and a Command Line Interface (CLI).
    - Comprehensive inventory and staff management capabilities.
    - Full support for standard CRUD (Create, Read, Update, Delete) operations.
    - Role-based access control for secure user role management (e.g., Admin vs. Cashier).

Education

- **B.Sc. (Hons) in Software Engineering – Undergraduate - Cardiff Metropolitan University**
  International College of Business and Technology (ICBT), Bambalapitiya, Colombo (main head office), Sri Lanka
  Expected Completion: May 2027

- **Higher Diploma in Computing and Software Engineering - Cardiff Metropolitan University**
  International College of Business and Technology (ICBT), Bambalapitiya, Colombo (main head office), Sri Lanka
  Expected Completion: March 2026

- **Diploma in Information & Communication Technology - 2024**
  International College of Business and Technology (ICBT), Bambalapitiya, Colombo (main head office), Sri Lanka

- **G.C.E. Ordinary Level**
  Vidura College, Thalawathugoda, Sri Lanka December 2019

Skills & abilities

- Programming Languages & Tech : Java, C++, Python, HTML, CSS, JavaScript, TypeScript, React.js, Node.js, Express.js, Bootstrap, Tailwind CSS, Kotlin.
- Cloud & DevOps : AWS Fundamentals, DevOps Principles, CI/CD Concepts
- Databases : MySQL, SQLite, MongoDB
- Tools & Platforms : Git, Visual Studio Code, Postman, Cloudinary, NetBeans, Version Control, Antigravity
- Core Concepts **:** Software Engineering, Mobile App Development (Android), Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Data Structures & Algorithms, UI/UX Basic Concepts

CERTIFICATIONS

- Introduction to Software Engineering – IBM (Coursera), Mar 2026
- Introduction to DevOps – IBM (Coursera), Mar 2026
- Introduction to Mobile App Development – IBM (Coursera), Mar 2026
- Get Started with Android App Development – SkillUp (Coursera), Apr 2026
- AWS Certified Cloud Practitioner Essentials – AWS (Coursera) , Apr 2026
- Cambridge English KET (A2 Level) – ESOL Certified
- Microsoft Office Diploma – Distinction Level
- Spoken English (Distinction) – Wendy Whatmore Academy

Languages

- English: Fluent (Spoken & Written)
- Sinhala: Native (Spoken & Written)
